- EARLY CONSULTATION TO DEVELOP NEW WORKING PRACTICES AND REASSESS SPACE REQUIREMENTS
- ADDITIONAL PROJECT FOR 'HAVAS LIFE MEDICOM' TO DESIGN AND MANAGE THEIR NEW WORKPLACE

CASE STUDY

WHAT'S THE STORY...

Working for one of the world's largest and most creative companies is always going to be interesting. The twist was that it was the Group Shared Services Division of the business.

Headed up by a "savvy finance man" the challenge was to provide something suitably creative, and efficient for this Group Support Team and also to look good in the accounts.

It was clear that change was in order. We agreed a new open plan environment, clearly branded, with excellent meeting and staff facilities. Using clear 3D visualisation, mood boards and visits to other projects we helped Havas see how the future workplace would look and function.

Having been introduced by the developers, Gallaghers, at an early shell and core stage, we worked with them to locate all the services we needed for the new workplace. We saved Havas in excess of £40,000 and two weeks on the programme!

With this successful project for the Group completed we were then introduced to the Medicom Team. For them, we have designed and managed the extension of their workplace inside the former home of AC Cars in Thames Ditton, Surrey.
